ABOUT GEOFFREY AND LINDA HOPPE

Geoffrey and Linda Hoppe founded the Crimson Circle in 1999 and have guided it to what has now become a global affiliation of New Energy teachers with the purpose of inspiring consciousness.

The Crimson Circle started in the living room of the Hoppe's home in the Rocky Mountains outside of Golden, Colorado. At the time, Geoffrey was an executive and co-founder of AirCell, Inc., an aviation telecommunications company. Linda was owner/manager of Sundance Group, Inc., a marketing consulting company. Geoffrey had been privately communicating with an angelic being known as Tobias for several years. As word about the Tobias Materials began to spread the meetings quickly grew beyond their living room.

The Crimson Circle is now a worldwide organization with live monthly webcasts, over 300,000 visitors per month on the main website, translations in over 20 languages and nearly 200 teachers certified to offer Crimson Circle courses.

Geoffrey and Linda were raised in the Midwest United States in large Catholic families. They started dating in high school and were married in 1977. Linda taught high school art for eight years in Wisconsin and Texas before working as a fashion merchandiser for Pier

Imports, Fort Worth, Texas. She later joined Geoffrey in his marketing consulting company and continued to operate the company until devoting her full attention to the Crimson Circle.

Geoffrey worked for several advertising agencies and manufacturing companies in the Midwest and Texas in senior marketing positions. At age 28 he started a marketing consulting company in Dallas, Texas, operating it for 12 years with industrial and high tech clients throughout the United States. He co-founded AirCell, Inc., an aviation telecommunications company, where he served as Vice President of Sales and Marketing until 2001. Geoffrey holds two U.S. patents and one international patent for multidimensional telecommunications technologies, and numerous trademarks and copyrights.

Tobias first presented himself to Geoffrey in 1997 on an airplane flight. Geoffrey started sharing Tobias' live messages with a small group of friends in 1999. Since then, Geoffrey and Linda have traveled over 500,000 miles and presented the information to tens of thousands of people around the world. Geoffrey also delivers messages from several other angelic beings that work with Tobias including Adamus Saint-Germain and Kuthumi Lal Singh.

Linda and Geoffrey work closely together when Tobias or the other angelic beings deliver their messages. As the channeler of the information, Geoffrey expands his consciousness into the non-physical realms and receives the "thought packets." He then translates the message into words for others to hear. Linda, sitting beside him, also helps bring in the message and holds an important energetic balance between the angelic being, Geoffrey and the audience. They find that this team approach keeps the message clear and grounded even as they venture into expanded forms of consciousness.

The Hoppe's formally organized the Crimson Circle in 2006 as the Crimson Circle Energy Company, Inc. with current headquarters in Incline Village, Nevada USA. They continue to travel over 100,000 miles a year, speaking before audiences in North and South America, Europe, Asia and Australia.
